LINERS

ZIP IN / ZIP-OUT

1608 Lightweight 30° F

This liner has 100% DuPont® nylon taffeta exterior, 5.0 oz. Hollofil® Dacron® polyester sleeve/body insulation.

1604 Mediumweight 10° F

This liner has 100% DuPont® nylon taffeta exterior, 200g. Thinsulate® body and 100g Thinsulate® sleeves to provide warmth without any unwanted bulk.

1619 Heavyweight -10° F

This liner is insulated with Primaloft™ a unique, patented micro-fiber. At equal weights and densities, Primaloft™ has been proven to be as warm as down and warmer than any other synthetic out there. If Primaloft™ gets wet, it still keeps you warm. Primaloft™ maintains warmth and is longer lasting and softer than any other insulation. Completely machine washable.

5247 Down -30° F

This liner is insulated with 162g of goosedown and has a 100% DuPont® nylon taffeta exterior. For extremely cold weather conditions.

RAIN PANTS

1625 Unisex

Dark Navy, 100% urethane coated nylon

- ◆ Two-way full length side zippers
- ◆ Elastic waistband with Velcro® side closures
- ◆ Inside weather flaps

- ◆ 14" height
- ◆ Walking heel
- ◆ Round toe, block heel, chevron sole

ORDERING INSTRUCTIONS

PLACING AN ORDER

Is Your Ordering Guide Current?

- Confirm that your Ordering Guide is current by checking the fiscal year on the guide's cover. If it is out of date, contact the local uniform coordinator at your duty station for a current Ordering Guide.

Did You Complete All Necessary Information?

- On your Order Form, print your name, duty station, duty station's e-mail address, daytime phone number and employee account number (last 7 digits of your social security number.)
- Check the box that corresponds with your classification: Class 1, Class 2, etc.
- If you are ordering a nameplate, provide your last name in the designated area on your order form. Please print legibly.
- Record your measurement information in the space provided. It is very important that this information is complete and correct. Please refer to the "Measuring Instructions" on page 2 of your ordering guide for detailed measuring instructions. Sizing may vary due to different manufacturers. Check all size charts. If your measurement falls between sizes, please order the next larger size.
- Enter the appropriate style number, item description, size, quantity, and total price for each item. Any additional information can be recorded in the special instructions section of the order form.
- All trousers are hemmed to your desired length but must be ordered in measurements of full one-inch increments. (Round your inseam measurement to next full inch.) If you desire, trousers can be shipped unhemmed. Please request this on the order form. Both men and women need to provide inseam lengths.
- Complete order totals lines (1, 2, and 3) at the bottom of the uniform item section. If line 1 exceeds line 2, record your payment method in the section provided.

Payment Methods

- Checks, money orders, Visa, MasterCard, and Discover accepted. **DO NOT SEND CASH.** Credit card orders must include entire credit card number and expiration date. There is a \$3.00 minimum order on credit card orders. Checks and money orders are used with mailed orders only. If you fax your order, retain the original copy and confirmation sheet for your files. If you mail your order, make a copy for your files. Please do not mail and fax the same order.

Mail Order To:

UNIFORMSOLUTIONS

Customer Service Department

P.O. Box 27003, Nashville, TN 37202-7003

Phone: 1-800-448-7969 FAX: 1-615-248-3437

FAXING YOUR ORDER

UNIFORMSOLUTIONS has experienced some problems with fax orders being difficult to read. While over 99% of the orders faxed to us are handled without incident, we are dependent on a telephone network and machines.

Please Follow These Fax Tips:

- Fax us your order at 615-248-3437. If you do not receive your order or a back-order notice within 15 days of your order, please call us to ensure we have received your order.
- If you fax an order during business hours (8:00 AM - 5:00 PM Central Time weekdays), you may verify receipt by telephone. You should call our 800 number within 10 to 15 minutes of sending the fax. This will enable us to check before the order is officially placed. If you do not call within this time frame, we may not be able to verify the order until it is keyed into our system.

- If you do not verify within 10 to 15 minutes after faxing, wait 48 hours for UNIFORMSOLUTIONS order processing to be complete, then telephone for your verification.
- If you choose not to verify and you have not received your order or a back-order notice within 15 days of the date of the fax, you should telephone to verify.
- If you call and verify your fax order, please record the person's name who verified, along with the date and time. If you call after 48 hours, the Customer Service Representative should be able to give you the order number.
- As we near the end of the fiscal year, please fax your order well in advance of September 1st. Because orders cannot be accepted after that date, you may want to verify as suggested above. UNIFORMSOLUTIONS employees will do everything possible to properly handle all fax orders.

ORDER STATUS

- Confirm the status of your order by calling the IVR (Interactive Voice Response) 24 hours a day, seven days a week. You can verify the status of your last two orders or check your allowance balance. Just call 1-800-448-7969.

UPON RECEIPT OF YOUR ORDER

Check your order as soon as it arrives!

- Check the packing list against the contents of box. Contact UNIFORMSOLUTIONS for errors or omissions immediately at 1-800-448-7969. Try on all garments to check the fit. No exchanges are made on items that have been worn, washed, or altered unless the item is defective.
- If you receive an item that is defective, return the item immediately with a description of the defect using the prepaid UPS label. **(Defective items - not including normal wear & tear - may be returned for exchange or credit at any time.)**

RETURNS AND EXCHANGES

60-day return/exchange policy

- All returns/exchanges other than defects must be made within 60 days of receipt of your order. The return/exchange form is included with your shipment. Use this form for ALL returns/exchanges.
For Returns, completely fill in the top portion of the return/exchange form including description, size, quantity, unit price and total price.
For Exchanges, completely fill in the space provided on the form.
- If your uniform allowance funds are depleted, include amount of any average. Check "Payment Methods."
- Prepare the return shipping box as securely as possible. All hats must be double-boxed to prevent damage.
- Use prepaid UPS label for shipping all returns.

SPECIAL SIZES

For sizes outside the ranges listed, call Customer Service at 1-800-448-7969, 8 AM - 5 PM, Central Time. Delivery of special sized items requires a minimum of 60 working days.

GARMENT CARE

When caring for your uniform, follow the instructions found on the care content label located inside the garment. We have included the following additional information for obtaining the maximum life of your uniform.

Polyester/cotton

- Machine wash garments in warm water. Do not bleach.
- Tumble dry on permanent press setting, removing promptly. Hang up so wrinkles will fall out. Touch up with a warm iron.
- For stains, spray a pre-wash on soiled area and then wash as instructed above.
- Dry clean periodically to sharpen creases.

Washable wools

75% polyester/25% wool.

- Hot temperatures cause fabric to shine. Always wash and press on warm settings.
- Machine wash in warm water with like colors. Water temperature should not exceed 90°-110°F.
- Use only non-chlorinated bleach when needed.
- Tumble dry on warm temperature not to exceed 120°F.
- Use a warm iron when needed.
- Occasional professional dry cleaning is required to restore appearance of fabric. After every fifth wash, dry cleaning is recommended.
- Industrial laundering is not recommended.
- Do not launder tailored coats; dry cleaning is recommended.

Hydroflex®

- DO NOT DRY-CLEAN
- Machine wash in warm water with a pure soap. Never use detergent, fabric softener, bleach, or any product with an oxidizing agent.
- Double rinse to ensure that no soap residue is left. Soap residue has an adverse effect on the water-repellent finish and coating.
- Tumble dry on medium heat. Dryer heat rejuvenates the water-repellent finish to maintain your garment's high performance.

Urethane coated nylon rain wear

- DO NOT DRY CLEAN; dry cleaning chemicals attack the garment's finish.
- Machine wash in lukewarm water with a pure soap only. Never use detergent, fabric softener, bleach, or any product with an oxidizing agent.
- Treat badly soiled areas before machine washing using a brush and a mild non-detergent soap solution in lukewarm water.
- Do not allow the coat to spin dry. Remove it from the machine after the rinse cycle and thoroughly air dry.

Care for your hats

- Brush your hat with a long, soft bristled brush.
- When hat is not in use, it should be placed crown down on a clean, flat surface. Hats should be stored in their boxes.
- If hat becomes damp from perspiration, the inside leather sweatband should be turned out so it can serve as support for the hat as it dries.
- If hat becomes water soaked - as in a sudden rain shower - it should be air dried naturally on a clean surface.
- In case of oil staining or spotting, any commercial fabric spot remover is appropriate. Place the liquid on a soft, dry rag letting it evaporate almost completely before using it to clean the hat. Remember that the spot remover's vapor, not the liquid itself, does the actual removing. Apply spot remover from the edges of the stain toward its center.

- Hats should be worn alternately. The recommended procedure is to "rest" your hat every couple of days when temperatures exceed 80°F. Once a week is sufficient in cooler weather.
- The best way to enter/leave a vehicle is with the hat in your hand. Remember to place the hat away from any sitting area.
- When storing a hat, place it in a cool, dry place.

Gore-tex® boots

- Air dry boots when the outer surface is wet. Do not expose Gore-Tex® boots to heat from campfires, hair dryers, radiators, etc. This will damage the Gore-Tex® boot liner inside these boots.

Gore-tex® oversocks

- Do not use extreme force when putting on socks. Stretching will break the Gore-Tex® membrane and destroy the waterproofing.
- The oversocks must be handwashed and allowed to air dry. Do not expose them to heat. Heat damages the Gore-Tex® membrane.

Thorlo® socks

- Follow the care instructions on the package. Size and cushioning properties will not change if the socks are turned inside out prior to laundering, as long as a liquid fabric softener is used. Follow these same instructions to restore the original size and cushioning if the socks did not receive this care in previous laundering. NEVER USE CHLORINE BLEACH. it will destroy the spandex® fiber in the socks.

Perspiration problems

Perspiration can have a number of harmful effects on fabrics, such as loss of fabric strength. To prevent such problems, the following precautions should be taken:

- Dry-cleaning solvents do not remove perspiration from a fabric. Affected areas should be called to the attention of your dry cleaner.
- Although worsted and worsted blend fabrics may not be washable, a perspiration affected area may be placed over a towel and blotted with a damp sponge. The area should then be blotted vigorously between two dry towels and hung to air dry.
- For extreme cases, dress shields and the substitution of T-shirts for sleeveless undershirts are recommended.

Removal of spots and stains

Take unwashable garments to the dry-cleaner as soon as possible. Identify the stain and the fiber content of the garment. Most stains on washable fabrics respond to the following treatment:

- Apply a pre-wash stain and soil remover (Spray'n Wash®, Shout® or Fantastik®) directly to the stain. Brush or rub treated surfaces together. Rinse in cold water and repeat until stain is removed.
- Apply a small amount of full-strength liquid laundry detergent directly to the stain. Brush or rub treated surfaces together. Rinse in cold water and repeat until stain is gone.
- If necessary, soak garment in an enzyme presoak (Biz®, follow directions) for 30 minutes. Rinse in cold water.
- Launder according to the instructions on the garment's care label. Do not use liquid chlorine bleach on colors.
